

Analytics Module

Total view of the tax department and its obligations in one place.

SEIDOR

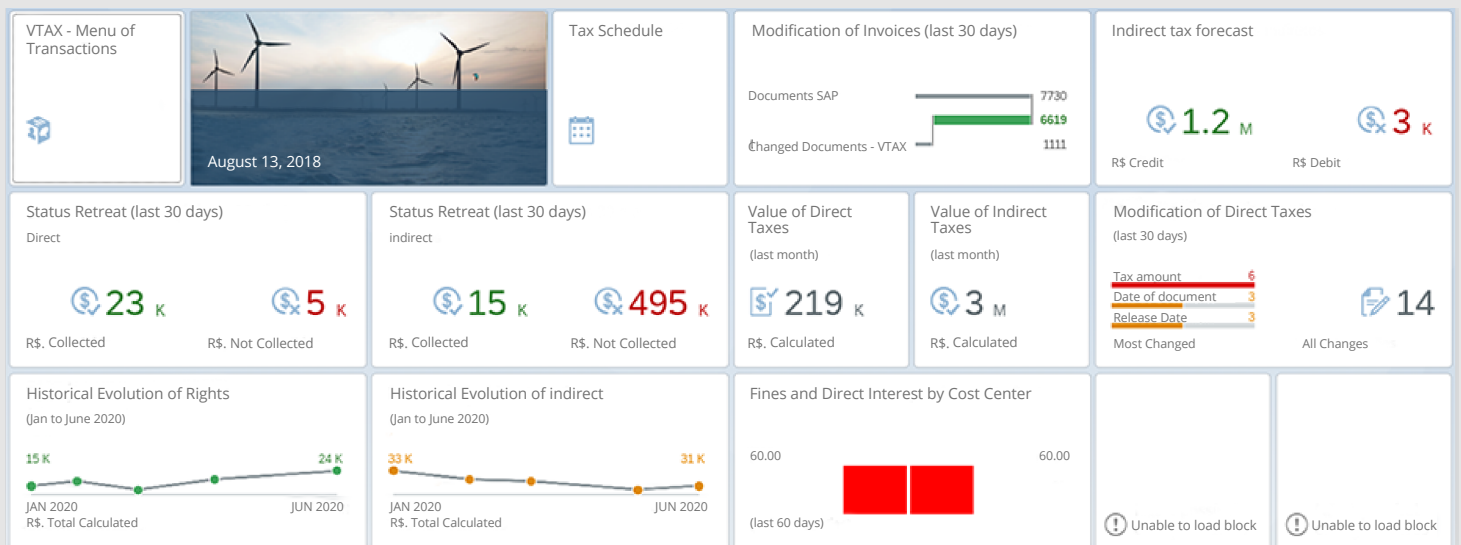

Improve Fiscal Area Performance with smart indicators and dashboards

The 4Tax Suite's Analytics module acts as a management platform with an integrated view of all phases of tax assessment, with exclusive indicators and dashboards for end-to-end coverage of your processes.

The 4Tax Suite Analytics module transforms your data into strategic vision

With real-time information, provided by our tax solution on smart dashboards, your team is armed to do what really matters and make **faster and more assertive decisions** with less risk and costs.

Main benefits and features

KPIs

Smart indicators developed for your tax area on the Fiori front-end.

Customizable dashboards

Specific indicators according to your scenarios.

Strategic vision

Strategic dashboards for your tax area to identify tax opportunities.

Single Database

Solution embedded in SAP (ECC, S/4 HANA and ACR/TDF) with real-time information, without duplication and data loss (integrations).

Compliance

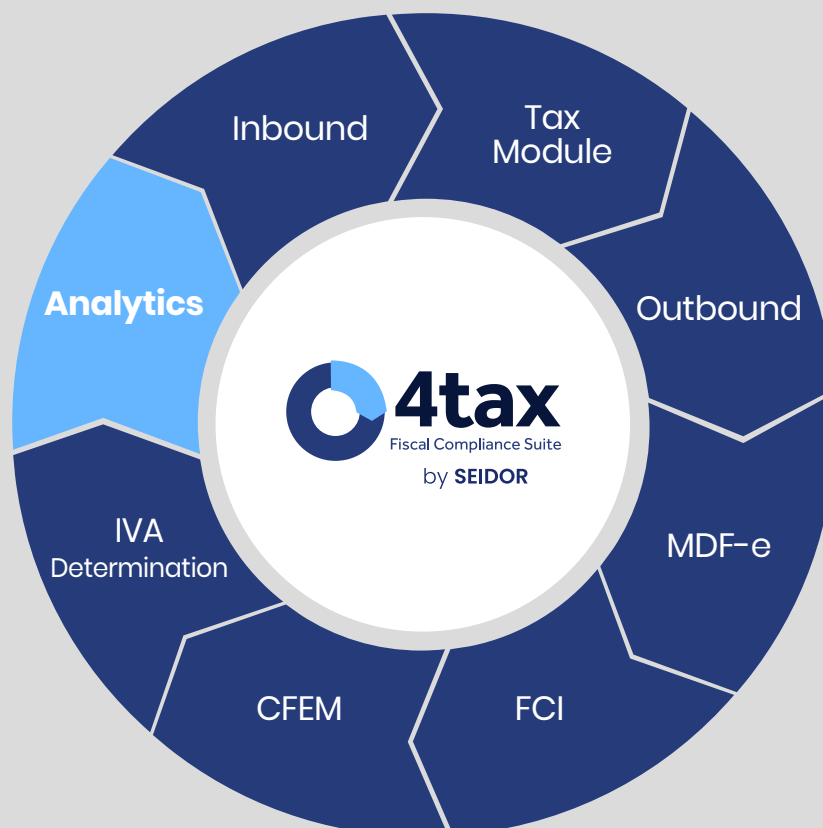

Indicators and dashboards that ensure tax management and tax governance.

Control panel

A visual experience and differentiated usability with the most advanced technologies on the Fiori front-end.

End to end tax process

Smart Dashboards with Specific Indicators for your Company

The Analytics Module of the 4Tax Suite has specific indicators to meet the results management and performance measurement needs of your tax assessment journey.

Support and Maintenance

SEIDOR has a **team of tax intelligence specialists** responsible for monitoring and disseminating, through periodic newsletters, the main changes in legislation. With a multidisciplinary team, we constantly evaluate impact of each of these changes in all of our products, providing updates in an agile and proactive way.

In addition to the tax expertise, we are a SAP specialist company, which allows us to meet the needs of our customers from end to end.
