Composition of costs and apportionment

Analytical report with the composition of costs and definition of apportionments.

Report for GRU

Analytical data for the generation of the Federal Tax Collection Guide.

Auxiliary reports

Opening of consumption, deduction of ore purchased from third parties, revenue breakdown, deductions, etc.

Reduction of calculated values

Allows reduction of calculated values (ex: correct calculation of freight, insurance and costing).

Storage of information

Control and Storage of information with access to tax documents used in the calculation.

Failure reduction

Reduces failures due to operational errors and brings fiscal compliance.

End to end tax process

Smart Dashboards with Specific Indicators for your Company

The CFEM Module of the 4Tax Suite has specific indicators to meet the results management and performance measurement needs of your tax assessment journey.

Support and Maintenance

SEIDOR has a **team of tax intelligence specialists** responsible for monitoring and disseminating, through periodic newsletters, the main changes in legislation. With a multidisciplinary team, we constantly evaluate impact of each of these changes in all of our products, providing updates in an agile and proactive way.

In addition to the tax expertise, we are a SAP specialist company, which allows us to meet the needs of our customers from end to end.
